NES ROVERjet Cannon

NES730 TRACKS CLOSED

OPERATOR CONTROL CONSOLE

MANWAY CANNON

Always at the forefront of technology NESL launch the NES 730 ROVERjet as a stand alone non-man entry Tank Cleaning Cannon or as a complete unit with the NES 701 Manway Cannon and the NES 502B Centrifugal Pump.

NES730 ROVERjet Tank Cleaning System for non invasive operations.

The NES ROVERjet system has been developed over many years for the purpose of desludging hydrocarbon and product tanks in a safe economical and environmentally friendly way.

When used in conjunction with the NES800 - 2 module treatment/oil recovery system the user has a totally self contained mobile tankside removal and treatment system that allows fast efficient tank turn-around without the need for man entry for removal of sludges.
